

# MIDTERM EXAMINATION

WEB SYSTEMS AND TECHNOLOGIES 1  
COLLEGE OF COMPUTER STUDIES

## ITA 121- Web Systems and Technologies 1

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

2<sup>nd</sup> Semester S/Y 2022 – 2023

### I. OBJECTIVE

To create interactive/integrated webpage applying basics of HTML, CSS, and/or JavaScript.

### II. INSTRUCTIONS

1. Build your own website (homepage only) based on the storyboard and site map you previously created. You can update and improve your webpage, but you should never ignore the information on your storyboard.
2. Place **ALL** your files in one folder and save the folder in the **DOCUMENTS** as: **SURNAME\_YEAR&SECTION\_MIDTERMEXAM**. The main page (html file) should have a filename of **(The Title of your Website)**. Once done, save and upload the folder to this google drive link:  
BSIT 1A: <https://tinyurl.com/MidtermBSIT1A>
3. The webpage should at least include the following features and their corresponding attributes based on what your webpage needed.
  - a. Minimum of 2 links to another page (you can used # as placeholder instead of link of the another html file.
  - b. Topic title at the Title Bar.
  - c. Name of your website/ logo
  - d. Declare elements:
    - i. Headings
    - ii. Lists (ul,ol)
    - iii. hr, br, etc
    - iv. Font color, font size, font style, etc.
    - v. Quotes and Blockquotes
    - vi. Bold, italic, strong, etc.
    - vii. Inserted related images.
  - e. Minimum of 3 links to website (references)
  - f. At least insert paragraphs/ descriptions.
  - g. Add a background color/ background image of your own choice.

*Note: If you are creating a webpage with a partner, you can use the same content and design depending on what you agreed, or you can use a different design and image set as long as the contents are relevant to your webpage. The evaluation criteria will be used to determine the scores. (Rubrics of Assessment)*
